

Department of Computer Science and Engineering

**FACULTY OF ENGINEERING AND TECHNOLOGY
UNIVERSITY OF LUCKNOW
LUCKNOW**

CS-501

Dr. Zeeshan Ali Siddiqui
Assistant Professor
Deptt. of C.S.E.

INTRODUCTION

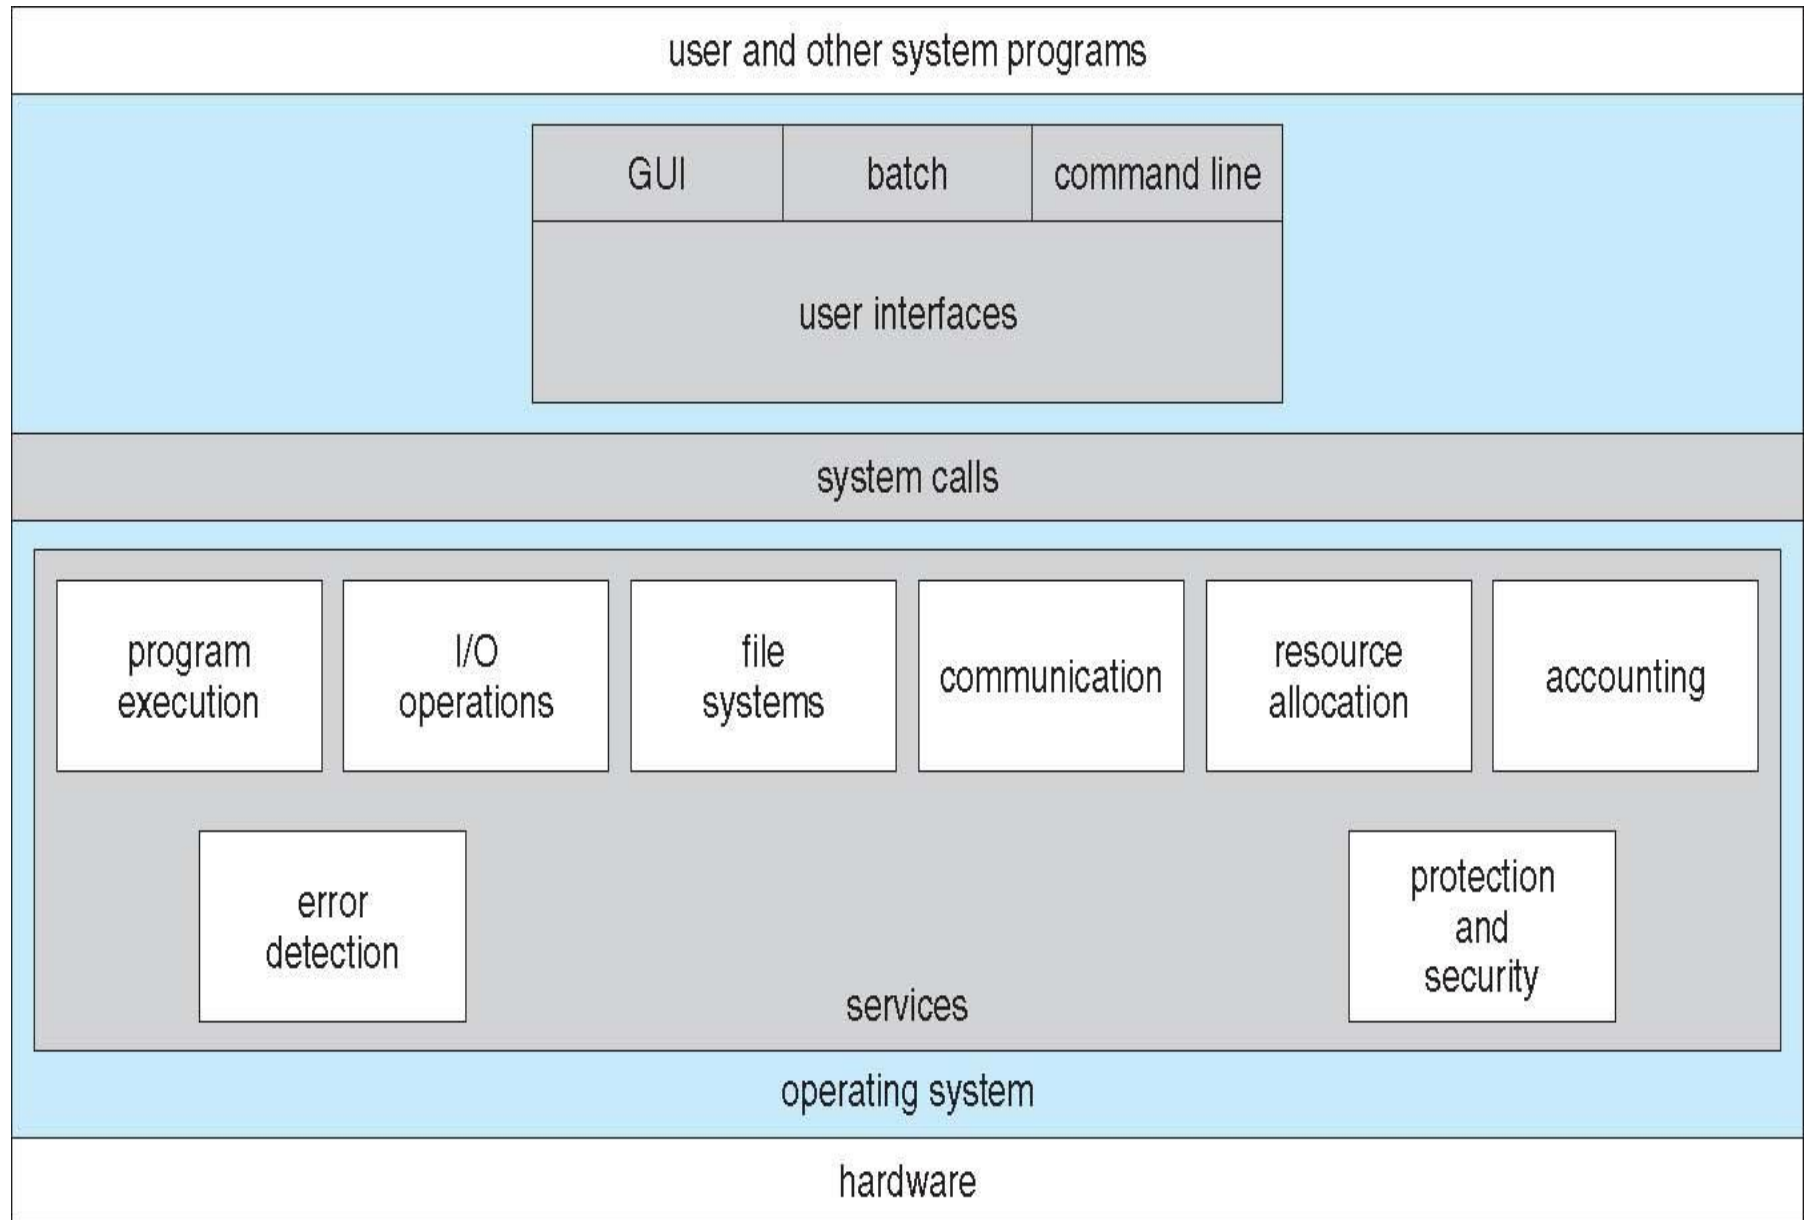

Operating System Definition

- *OS is a resource allocator*
 - **Manages** all resources
 - Decides between conflicting requests for efficient and **fair** resource use
- *OS is a control program*
 - **Controls** execution of programs to prevent errors and improper use of the computer
- “The one program running at all times on the computer” is the **kernel**. Everything else is either a system program (ships with the operating system) or an application program.

Operating System Functionality

- *Process Management*
- *Memory Management*
- *File Management*
- *Handling Input and Output*
- *Controlling Peripheral Devices (drivers/printers...)*

Operating System Services

Exercise

1. What is an operating system?
2. Describe the operating system functions.
3. List the objectives of an OS.
4. Explain four basic components of a computer system.
5. List various services provided by the OS.
